

Cyber Crisis Management Workshop

It is key for a company to embrace readiness from all aspects and not just IT, as cyber attacks do not just affect the IT department.

The frequency of cyber-attacks and breaches are increasing and the impact on a company can be significant from a legal, reputational and financial standpoint. It is key for a company to embrace readiness from all aspects and not just IT, as cyber attacks do not just affect the IT department. Business leaders need to understand the risk and impact to the business and ensure that the company has a comprehensive plan in place.

Our workshop will cover the 3 essential elements of cyber crisis management :

- **Preparation**
- **Response**
- **Remedial**

As part of the workshop, a Cyber simulation exercise will assist the team to understand how to handle an attack and how to respond.
